

# Job : IT LAN Engineer

## Who we are

GlobalTT Belgium is a major provider of satellite communication solutions, and we are looking for an IT LAN Engineer/Technician to join our team in Louvain-la-Neuve, Belgium.

## We are searching for:

The ideal candidate must have at least three to five years of successful experience in the same field and technology, a solid foundation in IT, LAN networks, computer Mikrotik routers, and Cisco routers, as well as a solid understanding of telecom Wi-Fi, VHF/UHF, and satellite telecom technologies DVB-S2 and Sx.

An experience in broadcast television through satellite (encoding, Zixi, multiplexing) provides a distinct advantage.

## Your job:

You will be responsible for the daily operation, maintenance, update and upgrade, server and virtual machine, local applications, alarm and monitoring systems, client assistance, and equipment preparation of our satellite teleport/gateway, as well as our client.

You will utilize cutting-edge technology, such as satellite, satellite modem & routers, Wi-Fi, and the majority of wireless technology, IP LAN technology, internet technology, cybersecurity, and fiber.

As a member of our team, you will eventually work on our new projects, however your primary responsibility will continue to be daily operations for the first month.. The job/position will also involve troubleshooting, repairing, and maintaining electronic circuits and systems for satellite communication solutions, as well as installing and maintaining LAN networks, computers/servers, Mikrotik routers, and Cisco routers, which are all part of our satellite communication solutions.

## Our value:

Our team and organization are committed to providing our clients with the greatest quality satellite communication solutions, and we place a heavy focus on teamwork and dedication.

We also place a premium on your enthusiasm for this technology and the upcoming innovation.

You will collaborate closely with your manager to guarantee streamlined operations, timely support, and accurate planning.

## Immediate future:

As the company expands, many new positions will become accessible in the future, such as full responsibility for particular departments after demonstrating loyal and dedicated collaboration on the internal technology segment's day-to-day operations and right initiatives.

## Requirements for this position:

- Electronic engineering or a closely related field with a bachelor's degree is necessary.
- 3-5 years of similar industry experience.
- Extensive understanding of computer, Mikrotik and Cisco routers, LAN networks, and IT, as well as the necessary certifications.
- Need familiarity and competence with Servers, Windows, Linux, and Virtual machines.
- Knowledge of satellite and telecom technologies, such as MODCOD and DVB-S2/S2x, is highly advantageous.
- Superior analytical and problem-solving skills.
- Competent in electrical and electronic fundamentals.
- Excellent understanding of computer security.
- Ability to work both independently and cooperatively.
- Outstanding interpersonal and communication skills.
- Having a remarkable ability to keep a detailed strategy and summarize all possibilities.
- A commitment to cooperation, loyalty, and project success.
- At least flawless in both spoken and written English; French is a plus.
- Ability to use instantly, including Word, Excel, and Outlook mail...

## What we offer:

- A job located in Belgium, in a very nice green and quiet environment, 20 Km south of Brussels, in a Scientific Parc.
- A wage and income that are in line with this position's requirements and the market's rapid evolution.
- A pay raise based on your rapid progress and integration, as we prefer long-term workers.
  - Number *will be revealed at the interview*.
- 20 annual vacation days.
  - Extra holidays from the company (+ 8 days) and extra Belgium legal "bank holidays"
- Belgium's comprehensive legal advantage (different "cheques").
- A car may be possible, depending on the present country regulatory position in Belgium, under change for now.
- Year-round periodic training on emerging technology.
- A situation that is exceedingly ordered and stable with a clear goal.
- A job on-site from 8:30 to 17:30 on weekdays, with an hour for lunch.

## What to do:

- If you're interested, send your CV to [job@globaltt.com](mailto:job@globaltt.com).
- There are two (2) available vacancies at this time, for this specific position.
- You will get the opportunity to work with cutting-edge technology and significantly impact the satellite communication industry as an IT LAN Engineer/Technician at GlobalTT Belgium.
- If you are a self-driven, imaginative person looking for your next challenge and committed to working in a team-oriented environment, we strongly invite you to apply.
- Please apply by sending your resume and cover letter to [\[job@globaltt.com\]](mailto:job@globaltt.com).

We look forward to hearing from you!

Your application will be received with great anticipation.

Best wishes- the HR department/ GlobalTT BE
